project_title: PROJECT PROPOSAL

project_name: POS System + KMJ System

proposal_intro:

Thank you for considering MakeWithUs for your digital infrastructure and operational software systems. This proposal outlines the development scope for two major systems intended to streamline business operations, employee management, workflow tracking, and business intelligence.

pos_system_description:

The POS System will focus on sales management, inventory tracking, billing, analytics, and reporting.

kmj_system_description:

The KMJ System will function as a centralized people management platform capable of handling employee records, attendance, permissions, workflow approvals, and operational visibility.

project_scope:

Both systems will be designed with scalability, modern UI/UX, cloud deployment readiness, and AI-ready architecture for future integrations.
