

NIMISHA AGRAWAL

📍 Ghaziabad ✉ nimishaagrawal115@gmail.com ☎ 6395428620 in nimishaag15 🌐 Nimisha987

Welcome!

Data Analyst with hands-on experience in turning raw data into actionable insights using tools like SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploration, and visualization to support strategic decision-making. Adept at writing optimized queries, building interactive dashboards, and automating repetitive tasks.

Education

KIET GROUP OF INSTITUTIONS

Sept 2024-May 2028

Information Technology

- GPA: 8.38/10.0

Kanha Makhan Public School

Mar 2024

Class 12th

- Percentage: 86

Kanha Makhan Public School

2022

Class 10th

- Percentage: 91.67

Projects

Ola Ride-Booking Dashboard Insights

github.com/Nimisha987 

- This project analyzes Ola ride-booking data to uncover trends in bookings, revenue, cancellations, ride distances, customer and driver behaviors.
- Tools Used: SQL, Python, PowerBi, Excel
- Key Insights : Booking Trend Over Time: volume by day/week/month

Walmart Sales Data Analysis — SQL, MySQL

github.com/Nimisha987 

- Analyzed 9,900+ Walmart retail transactions to derive insights on revenue, customer behavior, and branch performance.
- Tech Stack : MySQL — SQL — Python — Pandas — SQLAlchemy — VS Code — GitHub
- Identified top branches by revenue, most common payment methods, best-selling categories, and sales trends by day, time, and year.

Amazon Product Data Analysis Insights Dashboard

github.com/Nimisha987 

- This project analyzes product listings and customer reviews from Amazon to identify pricing trends, product rating distributions, best-selling categories, and customer sentiment. The dataset includes product name, category, price, rating, number of reviews, and more.

Technologies

Languages: C++, C, Java, HTML, CSS, JavaScript, ReactJS, REST APIs, Figma, TailwindCss, MySQL, Python

Technologies: Git, GitHub, Jupyter Notebook, VS Code, Anaconda, Git, Github

Data Science: Pandas, NumPy, Matplotlib, Seaborn, OpenCV, NLP, Artificial Intelligence, SQL, Scikit-learn

Mathematical & Statistical Tools: Excel, Power BI, Tableau

Specialized Area: Data Cleaning, Data Visualization, Reporting Automation, Business Intelligence
