EDUCATION

Information Technology

KIET GROUP OF INSTITUTIONS

Ghaziabad

Relevant coursework: Data Structures and Algorithms, Artificial Intelligence Machine Learning, Web Technologies, Generative AI

Graduating May 2028

8.38 CGPA

TECHNICAL SKILLS

Languages: C,C++,Java,Python,SQL,OS

Web Technologies: HTML, CSS, React.js, Tailwind CSS, NextJs, TypeScript

AI/ML Data Tools: NumPy, Pandas, Scikit-learn, NLP, OpenCv, LangGraph, LangChain , Flask, LLM

Tools,Technologies: Visual Studio Code, Git,Github,Vercel, Jupyter Notebook, Microsoft Excel

Soft Skills: Problem Solving, Teamwork

PROFESSIONAL EXPERIENCE

CSIR–Fourth Paradigm Institute (CSIR-4PI), Remote: Research Intern (SPARK Program) Apr 2026 – Present

- Selected for the prestigious SPARK (Student Programme for Advancement of Research Knowledge) by CSIR
- Working on an online research project under the guidance of Manish Kumar
- Gaining exposure to research methodologies and technical problem-solving in Machine Learning. .

makewithus, Remote: AIML Intern

May 2026 – Present

- Working on Artificial Intelligence and Machine Learning-based projects and applications.
- Developed an AI-powered chatbot for a website to assist users with automated responses and improve user interaction.
- Collaborated on AI/ML workflows, problem-solving, and real-world project development.

ACADEMIC PROJECTS

AI-Powered Customer Support Chatbot

May 2026

Built a full-stack AI chatbot with real-time LLM streaming

- Integrated LLM APIs via OpenRouter with real-time token streaming (SSE) delivering ChatGPT-like word-by-word responses using custom prompt engineering and intent detection.
- Built voice conversation using Web Speech API with a knowledge retrieval system feeding company context to the LLM.Designed Next.js streaming API with intent detection, automatic model fallback, and RAG-style context injection
- Designed Next.js streaming API with intent detection, automatic model fallback, and RAG-style context injection

EV Smart Energy Optimizer

jan 2026

Developed an AI-powered web application to predict electric vehicle battery consumption

- Added smart charging station recommendation logic based on geospatial distance calculations.
- Designed a RESTful Flask API for model inference and integrated it with a React.js frontend.
- Built a machine learning regression model using Scikit-learn to estimate battery usage.

ACTIVITIES

- Participated in Social Summer Of Code 2025(SSOC),contributing to Open-Source Projects and enhancing real-world coding experience.
- Solve 200+ coding problems on different platforms.
- AWS Certified Cloud Practitioner (CLF-C02) — Validated foundational knowledge of AWS cloud concepts, security, architecture best practices, and core services.
- AWS Certified AI Practitioner (CLF-C02) —Validated skills in AI/ML fundamentals, responsible AI practices, AWS AI services.
